Cross-cultural psychology is the scientific study of human behavior and mental processes, including both their variability and invariance, under diverse cultural conditions. Through expanding research methodologies to recognize cultural variance in behavior, language, and meaning it seeks to extend and develop psychology. Since psychology as an academic discipline was developed largely in ...

1. Introduction. Young workers are more likely to be injured at work than older workers (Breslin and Smith, 2005, Laberge and Ledoux, 2011) and this appears to be related to inexperience. As shown by Breslin and Smith (2006), short job tenure is a stronger predictor of occupational injury than age. Similarly, Sorock et al. (2001) showed that work accidents happen more frequently while the worker ...
