Data ($\Delta\Delta Ct$, ΔCt , $\Delta\Delta Ct$) are the values of subjects with respect to qualitative or quantitative variables.. Data and information are often used interchangeably; however, the extent to which a set of data is informative to someone depends on the extent to which it is unexpected by that person. The amount of information content in a ...

Quantitative Analysis: General, Steady and Reliable. For the quantitative analysis, the researcher needs to process the received data using the detailed set of classification and rules, before that the futures are classified, that helps to create the statistical models, reflecting the outcomes of the observation.
