Chapter 1: Hierarchical Network Design 3 Network Requirements (1.1.1.1) When discussing network design, it is useful to categorize networks based on the

Hierarchical Network Design - pearsoncmg.com

A computer network, or data network, is a digital telecommunications network which allows nodes to share resources. In computer networks, computing devices exchange data with each other using connections between nodes. These data links are established over cable media such as wires or optic cables, or wireless media such as WiFi.. Network computer devices that originate, route and terminate the ...

Computer network - Wikipedia

A large corporation that has many locations may have a backbone network that ties all of the locations together, for example, if a server cluster needs to be accessed by different departments of a company that are located at different geographical locations.

Backbone network - Wikipedia

The Lifecycle of a Revolution. In the early days of the public internet, we believed that we were helping build something totally new, a world that would leave behind the shackles of age, of race, of gender, of class, even of law.
