The Viessmann Group is one of the world's leading manufacturers of heating, industrial and refrigeration systems. Viessmann's comprehensive range offers individual solutions and efficient systems for all application areas and fuel types.

Viessmann - Heating Systems, Industrial Systems

Solar cell efficiency refers to the portion of energy in the form of sunlight that can be converted via photovoltaics into electricity.. The efficiency of the solar cells used in a photovoltaic system, in combination with latitude and climate, determines the annual energy output of the system. For example, a solar panel with 20% efficiency and an area of 1 m² will produce 200 W at Standard ...

Solar cell efficiency - Wikipedia

Lean manufacturing or lean production, often simply "lean", is a systematic method for waste minimization ("Muda") within a manufacturing system without sacrificing productivity, which can cause problems. Lean also takes into account waste created through overburden ("Muri") and waste created through unevenness in work loads ("Mura"). Working from the perspective of the client who consumes a ...

3D Systems offers complete on-demand parts manufacturing services, from 3D printed metal and plastic parts to CNC machining, injection molding, and cast urethane modeling.

3D Systems On Demand Manufacturing Services | Quickparts

The Journal of Manufacturing Systems (JMSY) publishes state-of-the-art fundamental and applied research in manufacturing at the systems level. Manufacturing systems are comprised of products, equipment, people, information, control and support functions for the economical and competitive development, production, delivery and total life cycle of products to satisfy market and societal needs.

The ecocirc XL is a highly efficient circulator that enhances commercial hydronics systems with superior quality and dependability. State-of-the-art hydraulics, advanced motor design, intelligent controls, and smart communication capabilities highlight expert engineering across a broad range of HVAC and plumbing applications.

1. Manufacturing definition and trends. Manufacturing can be described as a 5M system which consists of Materials (properties and functions), Machines (precision and capabilities), Methods (efficiency and productivity), Measurements (sensing and improvement), and Modeling (prediction, optimization, and prevention).

Recent advances and trends in predictive manufacturing

PUBLISHED PAPERS (in chronological order) Some of CRN's papers are available in a bound, hardcopy format (costs shown in US dollars).

Modern food industry operation entails sophisticated automation and control architecture. By applying the proven success of modern control technology to most of its operations including food preservation, manufacturing, packaging, and handling, the productivity of food plants can be significantly improved.
