Electrocardiography (ECG or EKG) is the process of recording the electrical activity of the heart over a period of time using electrodes placed over the skin. These electrodes detect the tiny electrical changes on the skin that arise from the heart muscle 's electrophysiologic pattern of depolarizing and repolarizing during each heartbeat .

ECG monitors display the heart rate. When an ECG strip is printed, most printers provide heart rate information at the top of the strip. Never the less, you might be in a situation where you must calculate the heart rate from the ECG recording. There are numerous methods and formulas, which can be used to calculate a heart rate from the ECG.
